

# BOSSCARS

Your Partner in Campus Parking Software Solutions

## Web Interface Module

Provides online permit application and appeal submission. Eliminates long lines in the parking office at registration time, and reduces or eliminates data entry by staff.

## Handheld Ticket Writing Module

Used with handheld computers, this module provides a quick and easy way to look-up vehicles, as well as boot, tow, and VIP information. Officers can easily and quickly enter, save, print, and download citations. Minimizes most data entry.

## Payroll Deduction Module

Automatically handles payroll deductions for parking permits in real-time, or sends payroll deduction to HR through a batch process.

## Online Payments Module

Allows customers to make parking-related payments on the web through a third-party payment gateway.

## Cash Drawer Module

Allows parking staff to take and track payments for the Parking Office, and perform reliable and accurate bookkeeping. Sends financial data to the Campus A/R System, allowing your Bursar to be the single point of collection on your campus. The Cash Drawer Module provides the option of collecting revenues in the Parking Office or through the Bursar.

## Lost & Found Module

Brings organization to an often chaotic process of dealing with lost and found articles. Provide better service to the campus community by knowing what has been reported as lost or found and responding at once to inquiries about lost items.

## Key-Tracking Module

Tracks campus keys. Allows Public Safety Office to know who has keys to buildings and rooms. Easily tracks keys for departing and new employees.

## Hearings Module

Schedules and tracks the Appeal Hearings process. Links directly to citation and appeal records. Assigns Hearings to a specific Hearing Officer(s), court, or appeal board. Provides an easy method to enter appeal decisions and comments.

## Lottery Module

Assigns priorities to customers for limited parking permits. At the time of drawing, the Lottery automatically assigns permits to the winners.

## Permit Fulfillment Module

Have permits mailed directly to the customer from the decal/hangtag manufacturer.

## Event Management Module

Allows for the planning, management, and tracking of scheduled events that impact parking operations for specific parking facilities. Provides flexible reporting by day, week, and date range. Tracks the allocation of resources, costs, staff, lots, tickets, permits, and third parties. Creates invoices and tracks financial issues associated with parking requirements for events.

## Parking Gates Interface Module

Integrates parking gate systems with BOSSCARS.
